

AI-powered telehealth platform

Scale mental healthcare without losing the human touch.

In veteran reintegration programmes
3× therapist capacity,
65% less admin time per patient, **92% satisfaction**

In addiction rehabilitation
75% reduction
in **documentation effort**, standardised care across facilities

Healthcare-grade trust from day one
ISO 27001, HIPAA, FHIR-aligned

Why?

AI-powered
agentic AI and predictive intelligence extend clinical capacity

Clinician-led
AI supports professionals, it doesn't replace human expertise

Patient-centred
continuous, personalised support beyond the therapy session

Measurement-driven
structured outcomes data behind every care decision

Core Capabilities

Patient Companion App

Agentic AI Automation

AI-Powered EMR & Command Centre

Measurement-Based Care

Care Environment

Veterans
PTSD & anxiety support, higher clinician capacity

Addiction Care
standardised treatment, less documentation

Education
student wellbeing, early identification

The future of **mental healthcare** is more **human**, with **AI behind it**
