Data Center

Build with **confidence.**

Scale with **certainty.**

50+ data center sites

government, military, BFSI, enterprise, co-lo, telco

10+ regions served

From Southeast Asia to the US, the UK, to Saudi Arabia and to Japan

9,300+ racks

concept design review for a 150MW UK hyperscale campus

6,000+ racks

certification consultancy for a 43MW Korean hyperscale facility

Reliable Infrastructure Across Industries

From Design to Real-World Deployment

Secure and Compliant Data Centres

Scalable, for Enterprise and Hyperscale

Why OREL IT Data Centre?

One partner, the full lifecycle — from site assessment to problem resolution, no fragmented vendors.

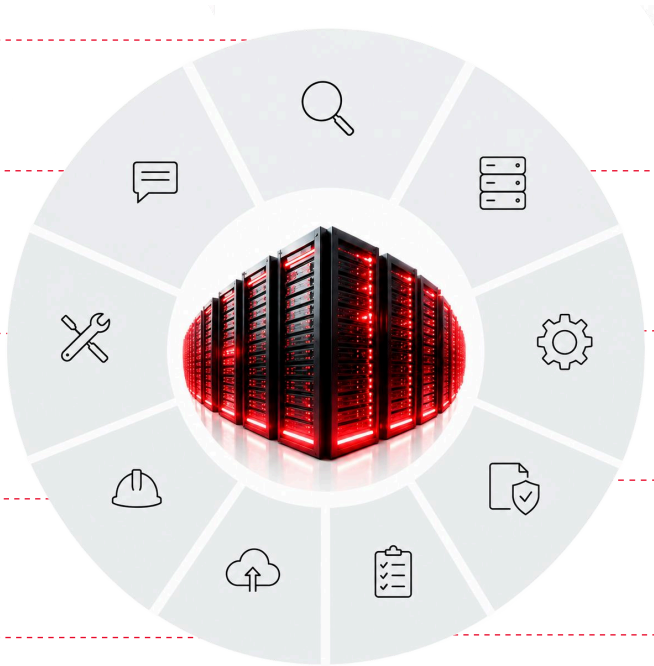

Certified design team — TIA-942 CTDC and CTIA, Uptime TS:T credentialed, engineers to PhD/MSc/BSc level, active members of TIA, BICSI, (ISC)², CSA and APNIC.

Guaranteed certification outcomes — Uptime TS:T and/or TIA-942 design and facility certification, guaranteed on delivery.

Proven at hyperscale, globally — from Sri Lanka's only High-Density TIA-942 Rated 3 facility to multi-thousand-rack hyperscale campuses across the UK, Japan and South Korea.

OREL IT Data Centre Core Services

- Site Assessment & Selection
- Consultancy & Assessment
- Planning & Design
- Construction Management
- Migration
- Co-Location Sourcing
- Operations
- Certification Support
- Auditing

Certified Standards:
